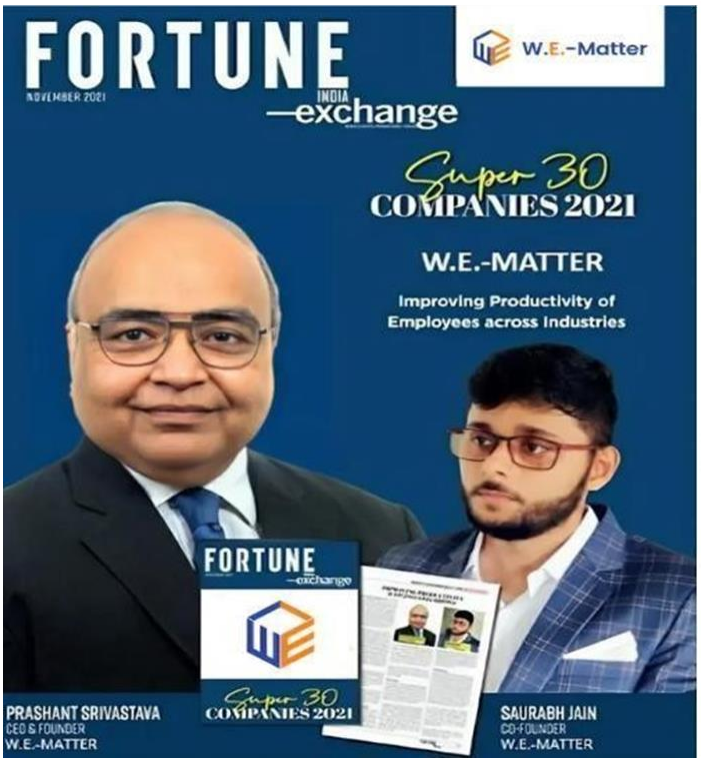
Would you like to work with a Fortune Super 30 company? With a Unicorn in the making?



Response.Mumbai
@timesgroup.com

Amid relentless competition and the drive for improvement, a gesture of appreciation significantly boosts morale for those excelling in their fields. Following this, the W.E. Global Employees' Choice Workplace 2024 event, with The Economic Times as media partner, was held on 12 July 2024, in Mumbai. The event brought together industry chiefs, innovators, and HR professionals for a day of recognition, insightful discussions, and new solution launches.

The event was hosted by W.E. (Wellness and Engagement) Matter, an employee experience company founded by Prashant Srivastava. The occasion, attended by the chief guest, Dr Ritu Anand, chief leadership and diversity officer at Tata Consultancy Services, also marked the launch of a Gen AI-powered employee experience consultant 'Kyara'.

Enlightening conversations

A key highlight of the event was the series of panel discussions. The first panel, chaired by Sudarshan Jain, an IIM-A alumnus and current secretary general of the Indian Pharmaceutical Alliance (IPA), featured Vineet Chattree, MD of Svatantra Micro Housing Finance Corporation Limited; Shaji Varghese, CEO of Muthoot FinCorp Limited; Vinod Grover, MD of Kaizen Institute South Asia and Africa; and Rakesh Jain, CEO of Reliance General Insurance. Their discussion on 'What do CEOs need to succeed?' provided valuable insights into leadership, innovation, and the evolving role of CEOs in today's business environment.

Another notable panel discussion focused on the 'Future of AI in HR: How will AI help create high-performance organisations to drive growth'. Several CHROs, including Sharad Sharma from Pramerica Life Insurance Limited, Suresh Sivaraj from Muthoot FinCorp Limited, Rajesh Derhgawen from Nippon Life India Asset Management Limited, Richa Sachdeva Chatterjee from IIFL Finance, Homi Tarapore from Trust Group, and Praveen George from Vedanta Sesa Goa Iron Ore, examined the transformative impact of Gen AI on people and businesses. They emphasised how AI-driven solutions can enhance the employee experience, streamline processes, and predict performance and attrition.

As the event concluded, attendees left with fresh outlooks on leadership, the integration of Gen AI in HR, and the future of the workplace.
