Web Development Intern

Company: Nexaflo Automations
Website: www.nexafloautomations.com
Location: Remote (Work From Home)
Duration: 1-2 Months (Extendable)
Stipend: Performance Based

+ About Nexaflo Automations

Nexaflo Automations builds **AI powered systems designed to solve real world problems** not in theory, but in everyday life. We create **practical, human centric AI solutions** that simplify workflows, improve decision making, and reduce friction in complex processes. Our work spans AI agents, automation systems, and intelligent platforms used by both individuals and businesses. We don't build AI for hype. **We build AI that works.**

+ What You'll Do

- Develop responsive and dynamic **web interfaces**
- **Integrate frontend with backend** APIs and services
- Work with **AI-generated or pre-built UI components**
- Optimize **performance, speed, and usability** of web applications
- Ensure cross-browser and cross-device **compatibility**

+ What We're Looking For

- Understanding of **HTML, CSS, and JavaScript**
- Experience with **React.js** (preferred)
- Basic understanding of **API integration (REST APIs)**
- Familiarity with responsive **design principles**
- Exposure to **AI website builders** or modern frontend tools

Bonus Points	• Experience deploying websites (Vercel or similar) • Experience with animations or modern UI libraries • Exposure to cloud environments / virtual machines
What You'll Gain	• Hands on experience building real world web applications • Exposure to modern frontend development workflows • Opportunity to work on live product features • Fast learning environment with practical experience
Work Structure	• Flexible working hours • Daily progress updates are expected
